error cabinet file "group 10.cab" required for this installation is corrupt and cannot be used Y Error 2350 En Need For Speed Undercover Como Solucionarlo. I used a forum search and found the following message, "this is not a YOSEMITE problem, you can run the game with this" YOSE "and" YOSE "and" YOSE "and" YOSE". But it doesn't work for me. I downloaded from the official site, and I downloaded to my desktop. I did this because I know it is broken. I have also tried this: I use YOSE:<http://www.yosemite.com/downloads/yosemite-devel-v1.0.1.zip> I open it up and it doesn't give me an error. I run the game and it works fine. BUT fffad4f19a
