The MOTORCYCLE ENGINE ... MotoGP. The motorcycle racing series contested by riders from all the leading motorcycle manufacturers, an International Championship run annually in all the major motorcycle markets in the world. ... (Lancia) i Factory Ducati (now Ducati Bikes), Laverda, Ligier, Aprilia, Moto Guzzi, Moto Morini, Moto-NOVA, Norton. The component has a visual impression of being circular or elliptical, but is actually composed of 4-sided polygonal geometrical tiling, similar to a rhomboid. Some have some chambers or regions of different size, like a 2 dimensional analogue of a woven textile. The size of the chambers may be used to differentiate between the different sources, but the chamber size itself is

not sufficient to identify the type of source. Another way to differentiate the types of sources is by distinguishing the physical characteristics of the textile, like the weave of the yarns. The defining characteristic of the Beaker Period is the prevalence of beakers as drinking vessels, the creation of Beaker Period sites, and the changing of beaker design. By ~2200 BCE, the beaker was the standard vessel for serving beer. By ~1600 BCE the beakers had become smaller, flatter, and more wheeled. A type of Urn of Oppidan origin, the Beaker is one of the most famous and widespread archaeological cultures of the Neolithic, Mesolithic and Early Bronze Age in Europe. The British term "Beaker" is occasionally used in a narrow sense to refer to certain types of vessels, as opposed to pottery vessels, that were made using the same technique, whereas the more common term is "Pottery Neolithic". Beaker Period | Pottery Neolithic |
