Passing XML data to a function I'm trying to pass an xml file to a function, but it's not working. When I check the file in the function body, the xml is all messed up.

```
extern void get(char *, const char *, const char *); int main() { char text[256]; const char *file; file = "file.xml"; get(text, file, "file"); return
```

0; } extern void get(char *, const char *, const char *); int get(char *name, const char *path, const char *value) { FILE *fp = NULL; int c, val = 0; fp = fopen(path, "r"); if (fp == NULL) { fprintf(stderr, "Can't open file %s: %s ", path, strerror(errno)); exit(1); } while ((c = fgetc(fp))!= EOF) { if (c == ') { if (c == '") { *(name) = fgetc(fp); name++; continue; } 2d92ce491b
