## Aquarium Lab [Win/Mac]

An all-in-one tool for monitoring and maintaining a healthy aquarium. This program has been designed to help owners of cichlid, reef and HOB aquariums monitor and maintain all water parameters. Tracking parameters such as water chemistry, aquarium health, temperature, pH, salinity, light intensity and many others, Aquarium Lab is the most complete tool you can find to manage your aquariums. The powerful aquarium calculator lets you calculate all the necessary data for chemical and water changes and keep track of the total results. This feature is especially useful for fish keeping hobbyists, as it provides the optimal conditions for optimal growth and health. You can also keep records of all fish in your tank, with detailed information, such as when the fish was purchased, and the care it's given. Aquarium Lab offers a rich collection of tools for tracking, organizing and managing your aquariums. You can create to-do lists, save valuable time, keep track of the costs of your aquarium purchases and create reports for several parameters. With the easy-to-read calendar, Aquarium Lab can automatically generate temperature, pH and salinity charts or reports. You can also print them out or export them to PDF. Aquarium Lab Features Aquarium Lab is a powerful all-in-one solution for monitoring and maintaining aquariums. It's designed to make your life easier. This software has been developed by fish lovers and water wizards to make aquarium keeping fun and easy, with easy-to-read charts and graph reports, live statistics for each fish, and even automatic water and salt changes. Use the powerful aquarium calculator to calculate all the necessary data for chemical and water changes and keep track of the total results. This program offers a rich collection of tools to monitor and maintain your aquarium. Among other things, you can create a to-do list for your aquarium projects, keep track of the costs of your aquarium purchases, create reports for parameters you would like to monitor, and even print reports or export them to PDF format. Aquarium Lab includes a rich calendar, that makes it possible to automatically generate graphs and reports, and the intuitive layout of the software is designed to make the program easily useable for beginners. You can also set the time interval for which it automatically generates graphs, or click once to generate them. Some of the key features of Aquarium Lab include: - Generate aquarium water change reports - Calculate energy consumption of aquarium equipment

### What's New in the?

Aquarium Lab is a lightweight Windows application with a sleek and clean layout and a well-organized set of features. Its purpose is to help users monitor and maintain the proper conditions for a healthy aquarium by keeping track of various water quality parameters and generating reports. Although it comes bundled with many dedicated functions, the layout is clean and straightforward. Thanks to its well-organized set of features, even rookies can learn to master the entire process with minimum effort. Aquarium Lab gives you the possibility to analyze your aquarium water chemistry by logging different chemical components, including pH, temperature, ammonia, calcium, copper, nitrate, oxygen, salinity, zinc, chlorine, iodine, and many others. The program features a built-in calendar for helping you analyze the water chemistry data for different days and months, and is able to automatically generate bar or line graphs. Plus, the graph can be printed or exported to JPEG file format. What's more, you can carry out aquarium calculations related to the tank (internal and external volume, surface area, empty weight), water (depth, volume, weight of water, evaporation, level drop), as well as total tank weight, pressure, and light intensity at tank bottom. The utility lets you keep a water change history, schedule partial water changes and observe how much waste remains at the end of the water change, and build a profile for each fish, coral, plant, and invertebrate in your tank including a photo, date when it was purchased, and dietary habits. You can keep track of additives, decorations, devices, and equipment, record the prices of all your aquarium purchases and generate detailed HTML reports, monitor the electrical costs (power consumption, cost of operating the device for certain periods of time), as well as manage multiple fresh and saltwater aquariums at the same time. Last but not least, you are allowed to build reports related to chemistry, water change, electrical use, and inventory, convert various units (temperature, salinity, alkalinity, nitrogen), print data, as well as use the rich-featured calendar for creating to-do lists, generating costs and expenses for multiple projects, tracking time spent on projects, and inserting tasks and attachments. All in all, Aquarium Lab proves to be a reliable application that comes packed with a complete suite of tools for helping you track a wide range of aquarium parameters. Key Aquarium Lab Features: - Records aquarium water changes and helps calculate the amount
