The Freesports 2-toned Premium Yellow and Black "Sportswatch" trainers - that won't be available for sale until October 21, 2012 - are an interesting colorway with a fabric blend that is made up of 70% cotton and 30% polyester. It might not be unusual for a Puma sneaker, but the relatively rare choice of yellow and black makes this colorway unique enough to stand out as a swan song from the brand that remains the world's leading maker of sneakers. Christie Brinkley is the most famous model Puma has ever had, and the company doesn't want to let her slip off the radar just yet. It's all about looking forward, not about looking back - and Christie Brinkley is definitely a big part of the brand's future. Puma is a brand that is committed to helping people experience positive change in their daily lives. The company's slogan, "Positive Possibilities," is just as true for the shoe industry as it is for Puma itself. The Puma Freesports 2-toned Premium Yellow and Black "Sportswatch" trainers feature a smooth outsole with a "Swatch" design on the heel. The sports style shoes will be available at Puma stores in North America, Europe and Asia, and at puma.com.1. Field of the Invention The invention relates to a process for the preparation of glycyrrhizic acid derivatives by enzymatic cleavage of the glycyrrhetic acid starting compound with an enzyme obtained from the bacterium *Bacillus licheniformis* ATCC 53926, and also to the use of such a derivative for the

Create very specific line styles quickly with the Line Styles Panel. Create line styles with the Line Styles Panel that accurately represent your design, such as a specific color, width, or thickness. Double-click the AutoCAD Drawing Object properties dialog box to open the property panel for that object. Double-click the drawing element to open a property panel. Or, select the drawing element, then press the shortcut key to open the corresponding property panel. Use the Line Shape property to change the size of the outline, arrowheads, or other line shapes in your drawing. Changes to line shapes don't affect the font, color, or line weight. Enhancements to the Snap System: Take advantage of the new Snap options. The drawing snap options now allow you to specify when the snap happens. This is the snap type that takes effect when you drag the mouse or use the keyboard to snap. Add a different type of object snap to your drawings. Add a spot-on, point-to-point, or manual drawing snap to your drawings. Use the drawing snap options to select the type of snap you want to use. Use the Snap options to turn on or off specific snap options. You can also customize when a snap happens on the fly. For example, you can move or rotate the base point of a snap relative to the selected object snap. Simplify the Snap Toolbar: The Snap Toolbar is an easy way to access the most commonly used drawing snaps. The Snap Toolbar can also be hidden or unhidden at any time. You can choose between two layouts for the Snap Toolbar: Standard and Compact. Select the Snap Toolbar from the View tab's Snap Options group. On the Snap Toolbar, you can select the toolbar elements to use for the active object snap. Use the Drawing Snap Method preferences to control when and how the Snap Toolbar is used. If you use the Snap Toolbar, you can control the color of the Snap Toolbar background. When you create a custom color for the Snap Toolbar, the background color also changes. If you want to use the Snap Toolbar on a default paper space viewport, set the Snap Toolbar Preview Color to the same color as your paper space viewport. Don't worry about the Snap Toolbar when you want
